If Barrett had insane harmony nobody would say he looks like a freak  
If I'm measuring correctly, Delon's is 1.52. Therefore, the Ideal is 1.52

I've done it for 4 or so, it ranges from 1.58 - 1.63 depending on angle/closeness to the camera. Doesn't matter in the end since my mid face is compact.

You just gonna ignore the fact that Delon's is 1.52 then?

You're measuring interocular distance over pupil to nasal tip right?

I measured Barrets the same way and got 1.62 or so

you measure from the pupils to the farthest projecting point of the nose, where there are the most highlights.

literally just look at the picture.

Preview in Mac. The rectangle select tool provides the vertical and horizontal height so I just divide them.
